

Inclusion by Design: Building Inclusive Educational Landscapes

A workshop for educators

Following her incredible keynote appearance at the 2023 Australian Inclusive Schooling Conference in Sydney, Illume Learning is thrilled to again host Dr Katie Novak on Australian soil.

Katie is an internationally renowned education consultant, author, and educator with 20 years of experience in teaching and administration, an earned doctorate in curriculum and teaching, and twelve published books.

Katie is best known for her work that focuses on the implementation of inclusive practices, Universal Design for Learning (UDL), multi-tiered systems of support (MTSS), and universally designed leadership. Her work has impacted educators worldwide as her contributions and collaborations have built upon the foundation for an educational framework that is critical for student success.

In these workshops, Katie will outline the beliefs and frameworks that support quality inclusive practice.

Her analogies and examples will deepen your understanding of how to implement changes to your school or classroom to ensure all students can participate on an equal basis.

Participants will be inspired and encouraged to consider the importance of including all learners, and will leave equipped with the tools to make inclusion a reality.

DR KATIE NOVAK
