

WHEN A CYCLONE COMES

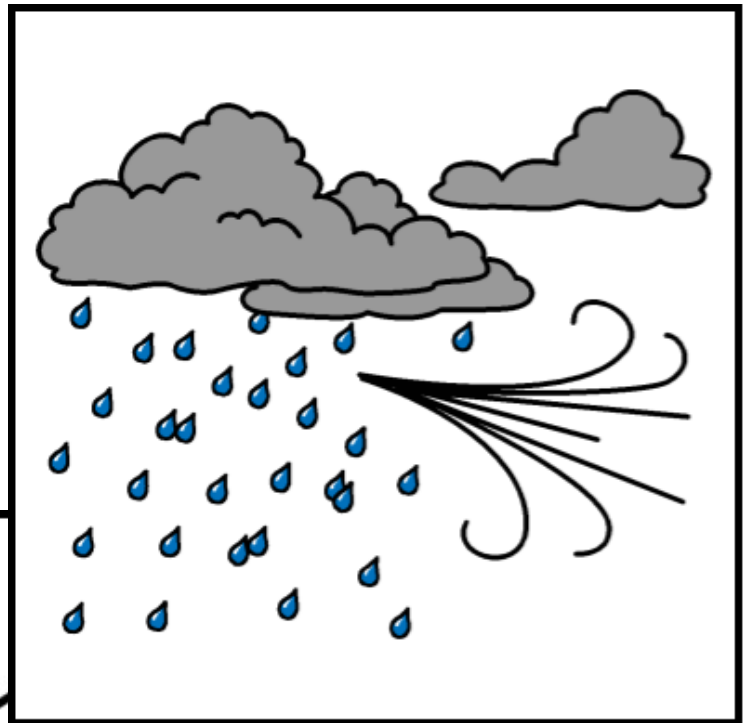

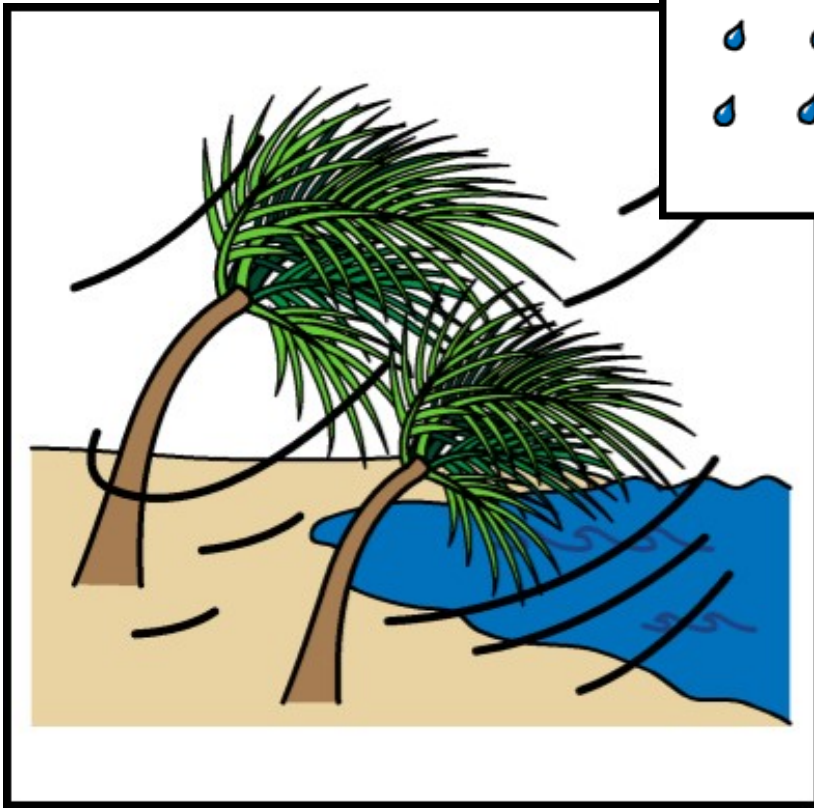

We live in Queensland.

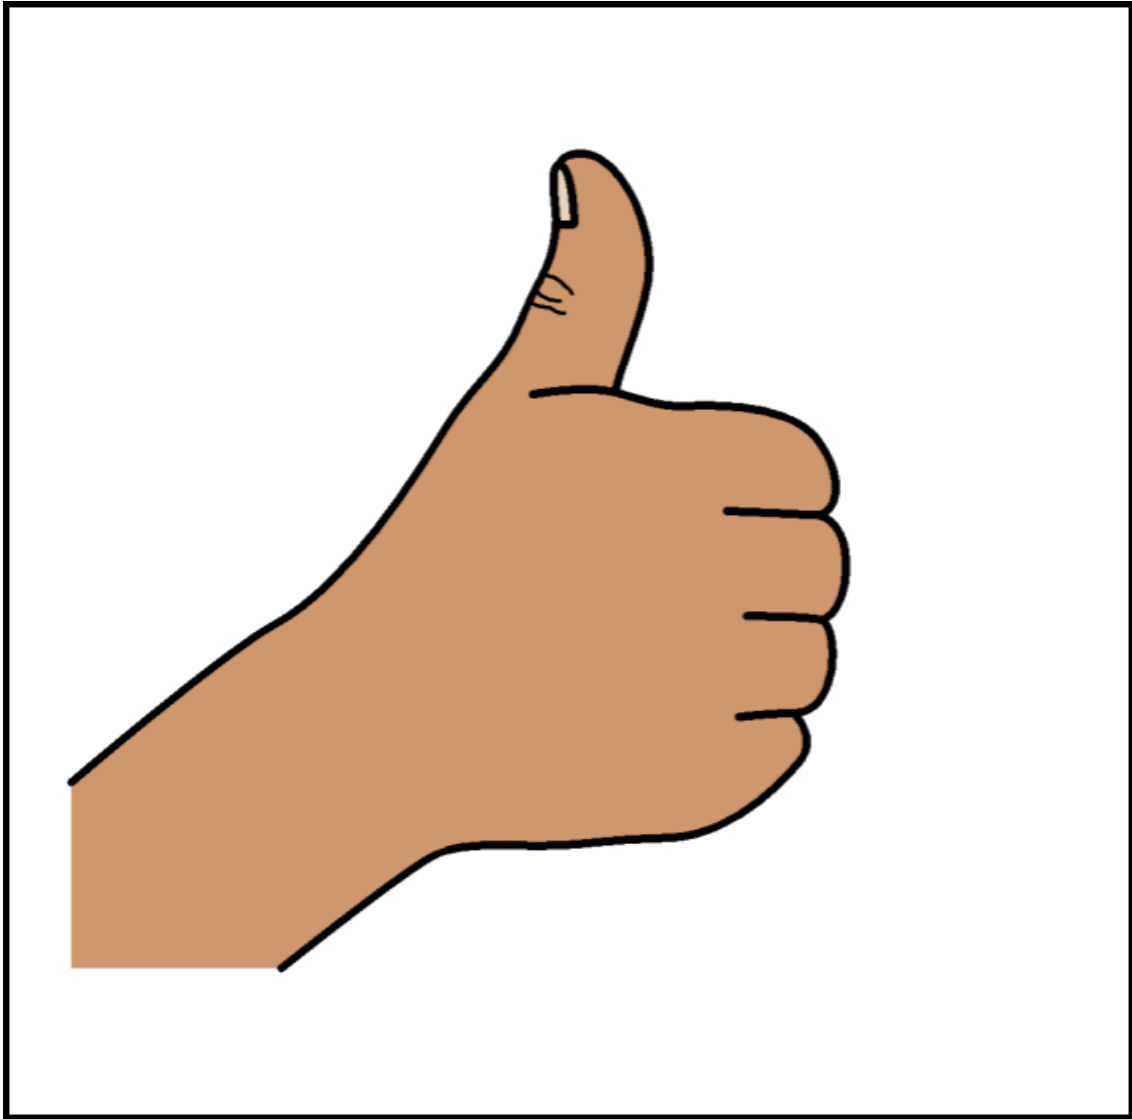

Sometimes there are cyclones in Queensland.

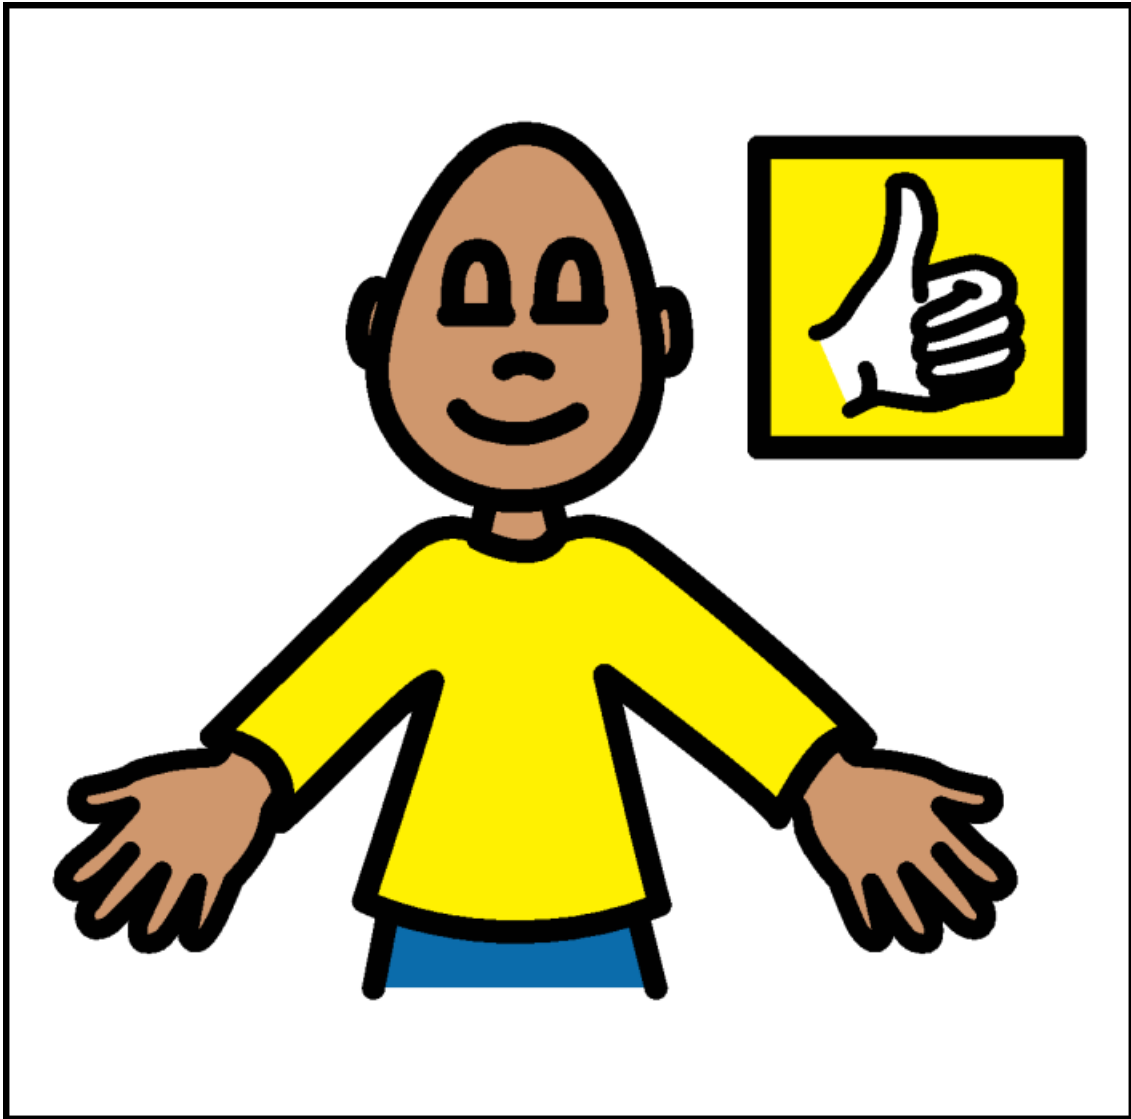

A cyclone is a big storm.

There can be very strong winds and lots of rain during a cyclone.

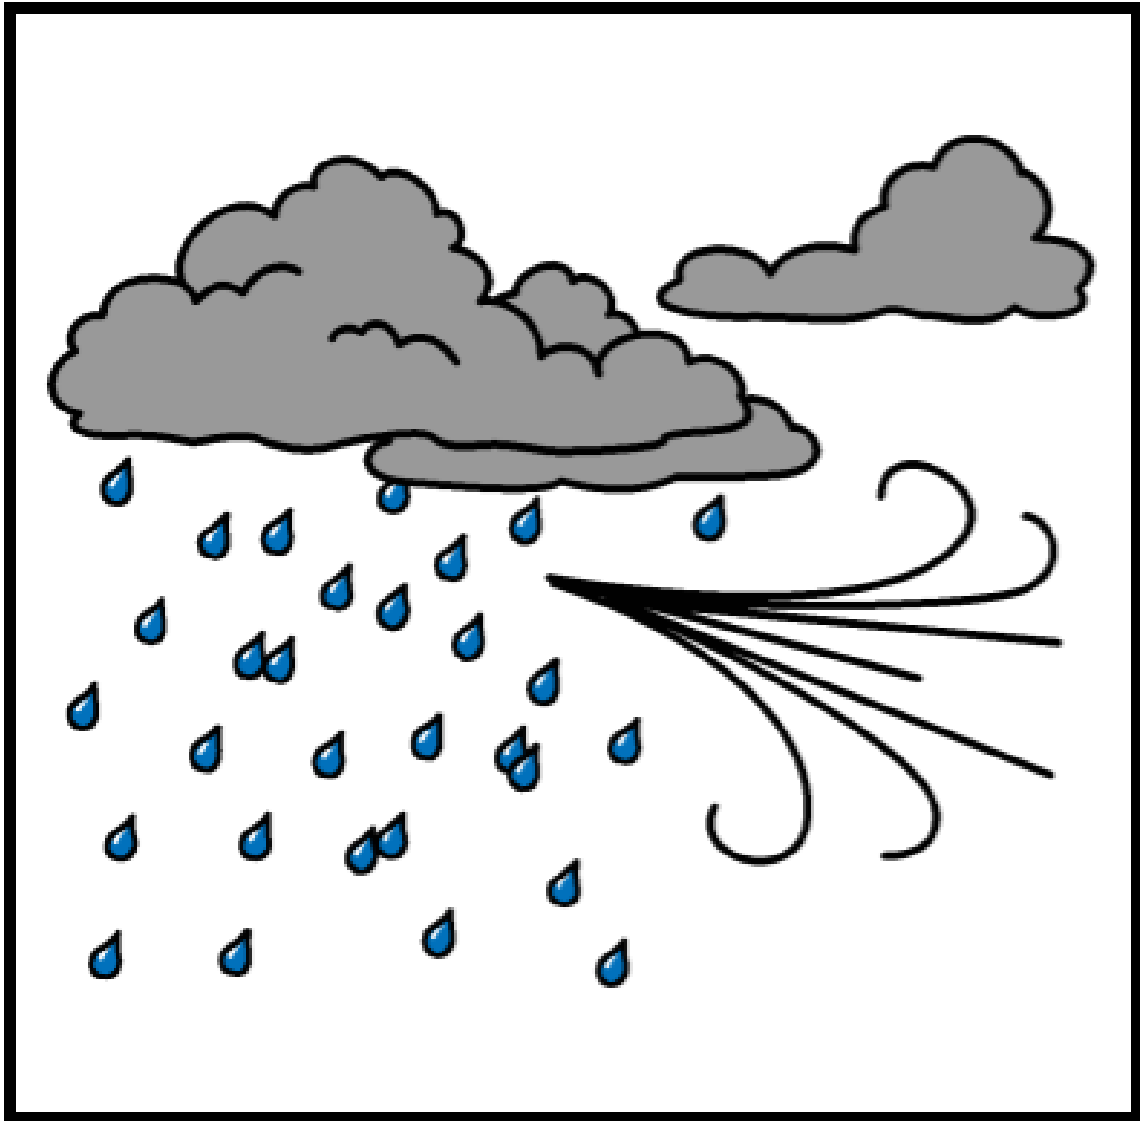

When a cyclone is coming we should get ready. We will make sure we have food and water, torches, batteries and a radio to listen to the news.

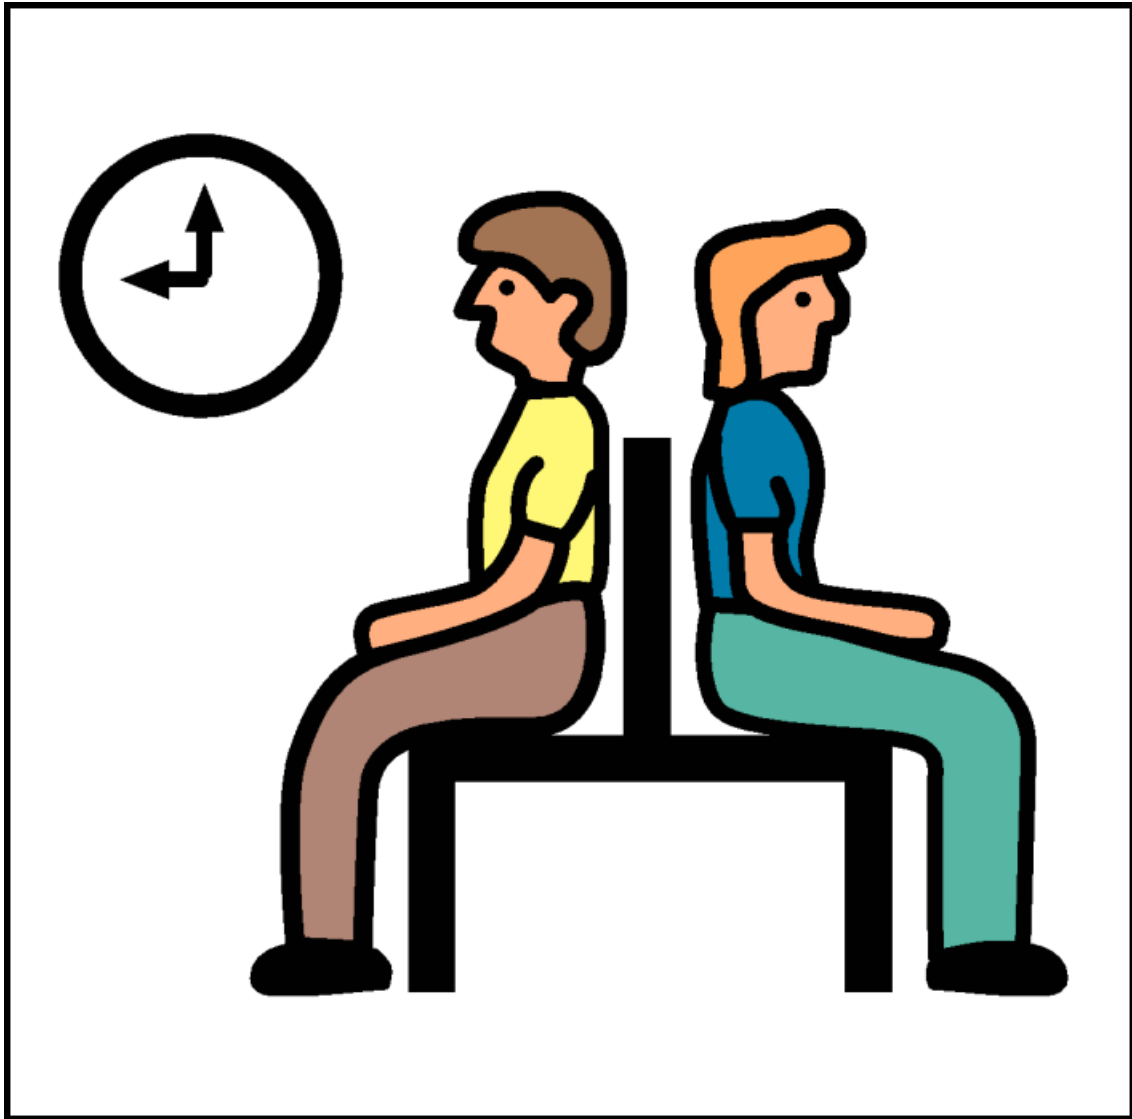

When a cyclone is coming, sometimes it feels scary. If we stay in a safe place we will be OK. It is important to stay safe.

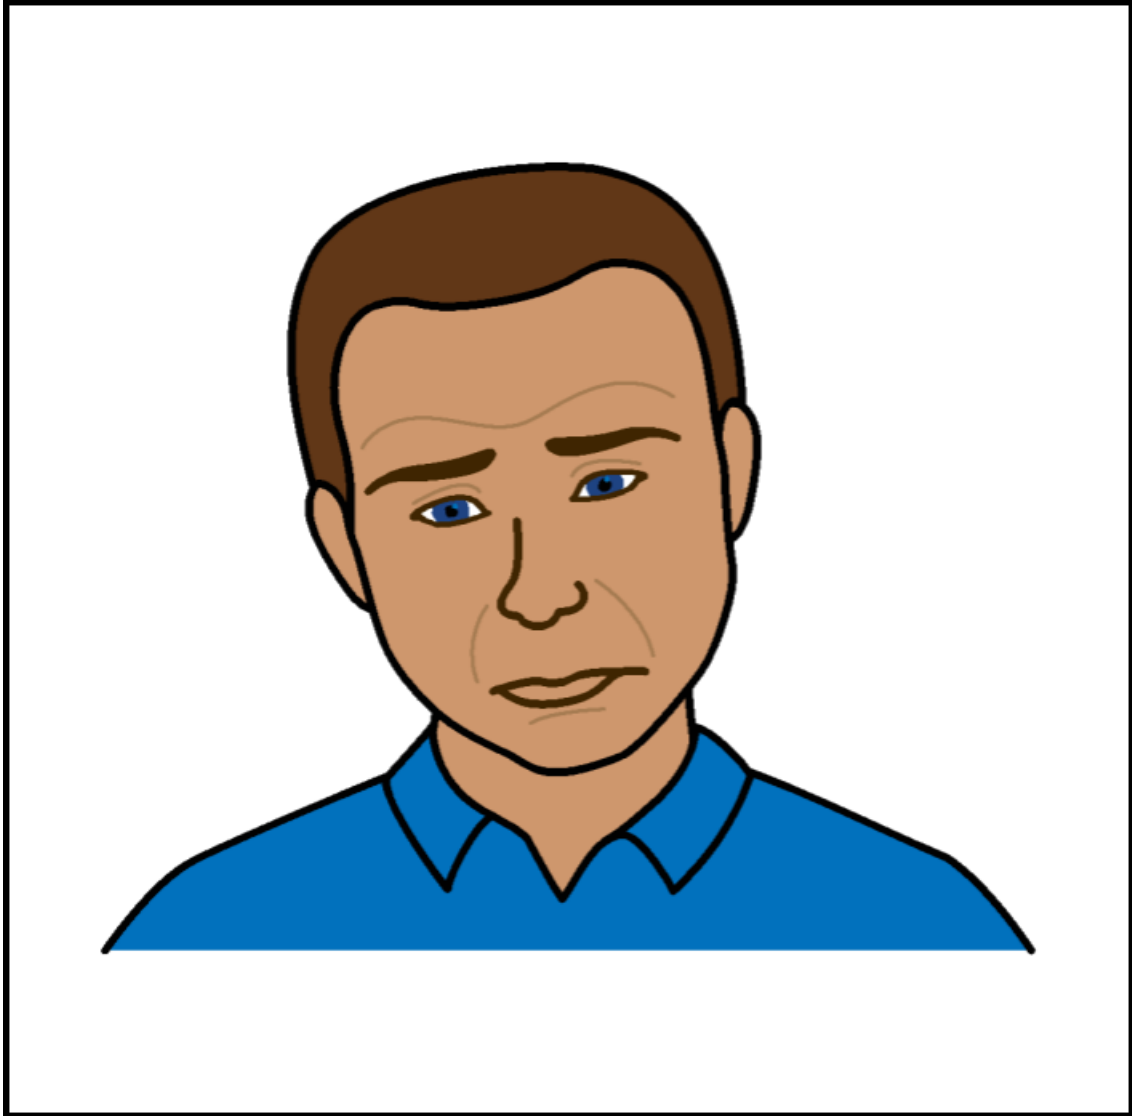

When a cyclone arrives there will be lots of rain and lots of wind. It might be very loud.

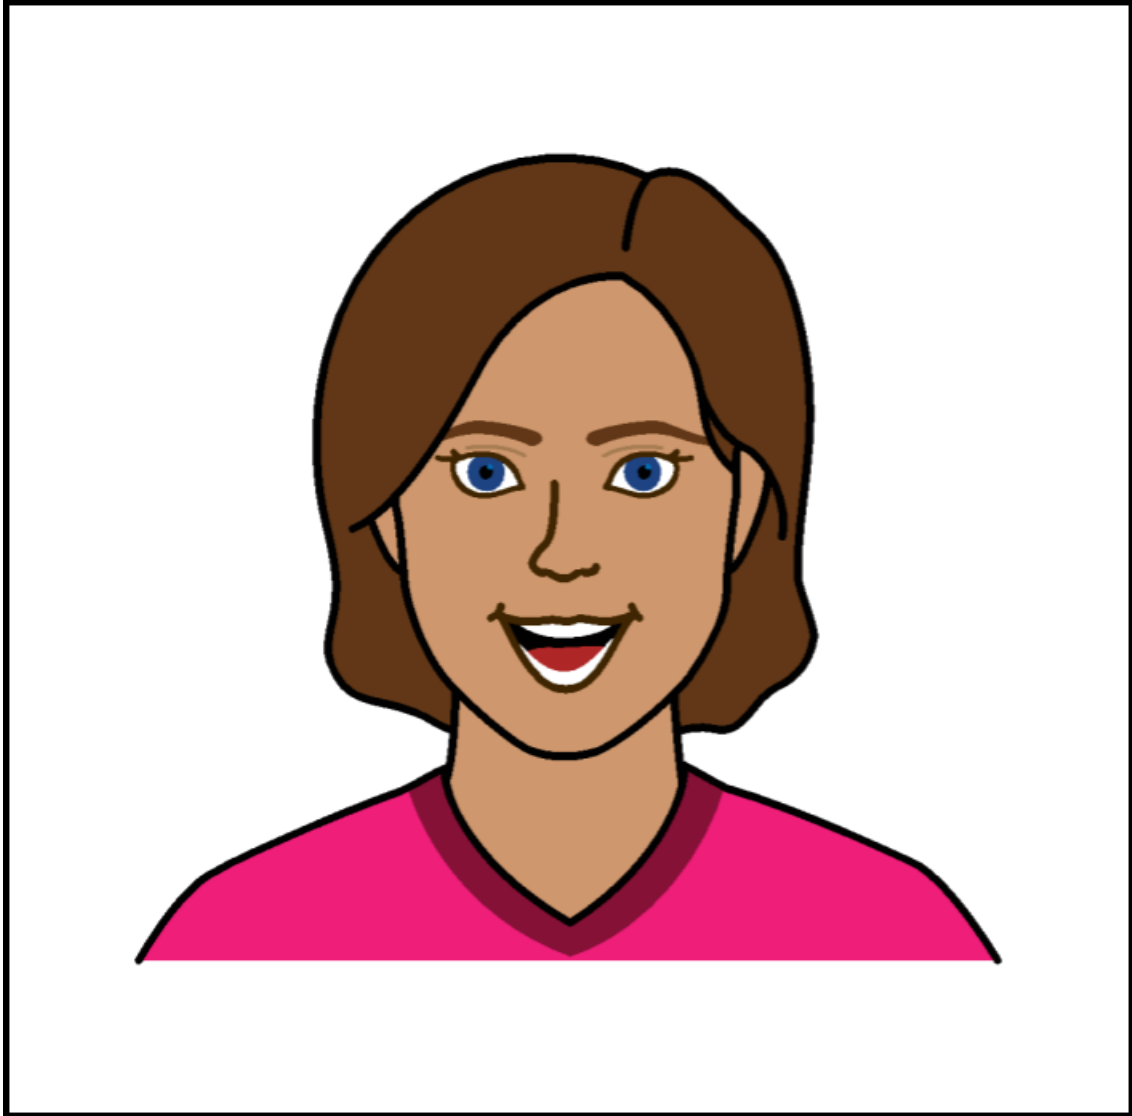

When a cyclone comes, we need to wait for it to be finished. It might feel like a long time. If we wait, a cyclone will always go away.

When a cyclone has finished, sometimes there will be a big mess to clean up. This might make some people sad.

*Everyone will be happy that the cyclone
has finished.*
